ABSTRACT

In today's competitive 'Furniture Web' market, it is important for retailers to have a website where their products can be sold online. An e-commerce site called liyawel.com was created for this master project. The main goal of the project is to create an affordable yet professional website; hence an open-source solution known as Ecommerce was used to develop a business system. The latest version of the website includes a front page for viewers and a back page for the store owner to manage the site. Additionally, the site is accompanied by a description that includes site requirements, design recommendations, competitive analysis, site content, site structure, storage units, security methods, payment methods, marketing methods, site management, routing, and user requirements. , cost and benefit analysis, development strategy and project plan.

1. INTRODUCTION

Vehicles have changed life all over the world. Human Resources is more than a resource; reflects the state of the economy. It will be more prestigious for them because it is special equipment, that is, expensive and unique. The rich like to buy something very small, something unique, or something that no one else in the world can have, and they pay very high prices for it. The material market offers Maraging in a great opportunity to enter the market and conquer it. This trend is supported by major real estate development activities in Indonesia. Developers continue to build townhomes, townhouses, high-rises, offices and more. Of course, all buildings need materials, but Marga Agung has focused on non-material products for now, but if Marga Agung considers the size of the material market, it should enter this market because the market is large and Marga Agung has all the facilities. From natural resources to machines from natural resources, this opportunity is too good to refuse. Furniture provides a complete design for our home. It does not matter what the purpose of buying furniture is, but it definitely takes a lot of time and makes your home feel full and complete. Your home should be relaxing and conducive to health, both mental and physical. We know that we need furniture for our good life, for storage, for sitting to relax.

APPLICATIONS OR SCOPE :

- The online store is accessible anytime, anywhere on any device which can access internet.
- The facility to provide home delivery makes customer happy.
- Products from all over the world are available to customer with one single click.
- User can buy or sell according to need.
- Customers or users can request customized products.
- The instructor can monitor the user's activity.
- User can manage content in a single section.
- This website can save the user time and effort.
- This site offers a user-friendly interface.

2. RELATED WORK

The site is complete in every respect. It is based on the click and earn' policy. This project aims to create a website for someone with knowledge An Online furniture shop that allow users to check for various furniture available at the online and purchase online. The project consists of list of furniture products displayed in various model and the user may browse through these product as per categories. If the user likes a product, he may his shopping cart. Once user wishes to checkout, he must register on the site first .He can then login same id password next time. Now he may pay through a credit card or cash delivery This site offers a user-friendly interface.

LIMITATION:

- No payment gateway is added only cash on delivery.
- There is no third party for home delivery.
- There is need for internet connection to access the store.
- Registration and log-in are required.

SUMMARY

Motivations for this project is there are various people with skills, local shopkeepers, and businessman; they don't get to showcase their work. This website provides them a platform to buy as well as sell the artwork. The goal is to provide a right platform for peoples who have skills and uniqueness in their work but they are unable to put their works in front of the world due to the lack of money for the advertisement.

An online payment gateway can be added and deliveries can be managed using a third party is the future scope of this website.

3. CONCLUSION

Online shopping provides us with convenience, but it also encourages irresponsible spending behavior, such as taking advantage of free returns and fast shipping. This adds to the existing environmental problems we face: global warming, waste, and pollution. Therefore, we need to change our attitude towards e-commerce and become responsible, non-exploitative and environmentally friendly people. Furniture provides a complete design for our home. It does not matter what the purpose of buying furniture is, but it definitely takes a lot of time and makes your home feel full and complete. Your home should be relaxing and conducive to health, both mental and physical. We know that we need furniture for our good life, for storage, for sitting to relax.
